ДОКУМЕНТ ПОДПИСАН ЭП
Сертификат: c7fcee22ea712e8a9d62ca0595e78e8dabbfaa85
Владелец: Директор ИПИТ Кольчурина Ирина Юрьевна
Действителен: с 4 июня 2025 г. по 26 августа 2026 г.
Дата и время: 23-06-2026 16:37:26 ПРОВЕРИТЬ ПОДПИСЬ

1 Цели и задачи освоения учебной дисциплины

Целями учебной дисциплины являются:

– формирование навыка общения на профессиональные темы на иностранном языке;
– формирование компетенции пользоваться профессиональной документацией на иностранном языке.

Задачами учебной дисциплины являются:

– освоение правил употребления базовых грамматических конструкций и лексических единиц общесоциального и профильного характера;
– овладение лексическим минимумом в размере (1200-1400 лексических единиц) и грамматическим минимумом, необходимым для общения, чтения и перевода (со словарем) иностранных текстов профессиональной направленности.

2 Место учебной дисциплины в структуре ООП по специальности

Учебная дисциплина относится к учебным дисциплинам социально-гуманитарного цикла ООП по специальности 15.02.18 «Техническая эксплуатация и обслуживание роботизированного производства (по отраслям)».

Учебная дисциплина базируется на предварительном усвоении обучающимися учебных дисциплин:

– Иностранный язык.

Учебная дисциплина дополняет умения и знания, получаемые по одновременно изучаемым и последующим учебным дисциплинам:

– Защита дипломного проекта (работы).

3 Планируемые результаты обучения по учебной дисциплине

Процесс изучения учебной дисциплины направлен на формирование следующих компетенций:

Общие компетенции

– ОК 02.: Использовать современные средства поиска, анализа и интерпретации информации и информационные технологии для выполнения задач профессиональной деятельности

– ОК 03.: Планировать и реализовывать собственное профессиональное и личностное развитие, предпринимательскую деятельность в профессиональной сфере, использовать знания по правовой и финансовой грамотности в различных жизненных ситуациях

– ОК 04.: Эффективно взаимодействовать и работать в коллективе и команде

– ОК 05.: Осуществлять устную и письменную коммуникацию на государственном языке Российской Федерации с учетом особенностей социального и культурного контекста

– ОК 09.: Пользоваться профессиональной документацией на государственном и иностранном языках.

В результате освоения учебной дисциплины обучающийся должен уметь, знать:

Код ОК, ПК	Уметь	Знать
ОК 02. ОК 03. ОК 04. ОК 05. ОК 09.	вести диалог (диалог-расспрос, диалог-обмен мнениями/суждениями, диалог-побуждение к действию, этикетный диалог и их комбинации) в ситуациях официального и неофициального общения сообщать сведения о себе и заполнять различные виды анкет, резюме, заявлений и др. понимать относительно полно (общий смысл) высказывания на английском языке в различных ситуациях профессионального общения читать чертежи и техническую документацию на английском языке называть на английском языке инструменты, оборудование, оснастку, приспособления, станки, используемые при выполнении профессиональной деятельности применять профессионально-ориентированную лексику при выполнении профессиональной деятельности устанавливать межличностное общение между участниками движения WS разных стран самостоятельно совершенствовать устную и письменную профессионально-ориентированную речь, пополнять словарный запас	лексический и грамматический минимум, необходимый для чтения и перевода (со словарем) английского профессионально-ориентированного текста лексический и грамматический минимум, необходимый для заполнения анкет, резюме, заявлений и др. основы разговорной речи на английском языке профессиональные термины и определения для чтения чертежей, инструкций, нормативной документации

4 Объем и содержание учебной дисциплины

Учебная деятельность обучающихся предусматривает учебные занятия (практическое занятие), самостоятельную работу, а также другие виды учебной деятельности, определенные учебным планом и календарным планом воспитательной работы.

Содержание учебной дисциплины

Раздел 1 Английский язык в профессиональном общении;

Тема 1.1 Я и моя профессия (Современный мир профессий. Проблемы выбора будущей профессии. Компетенции старшего техника. Востребованность профессии в современном мире.
Английский язык-язык международного общения в современном мире. Его необходимость для развития профессиональной квалификации. Роботизированное производство. Типовые инструкции по охране труда.
Грамматический материал: временные категории будущего времени: Future Simple, Present Progressive. Степени сравнения прилагательных. Модальные глаголы.
Лексический материал: Лексические единицы с обозначением профессий и описание соответствующих им действий по модели (an engineer looks after machines). Чтение текстов с профессиональной направленностью.
Говорение: Group discussion «Advantages and Disadvantages of the chosen profession». Монологическое высказывание по теме «It is important to be a qualified professional».);

Тема 1.2 Чтение чертежей и технической документации на английском языке (Грамматический материал: модальные глаголы, Participle 2, времена группы Perfect.
Лексический материал: обозначение реквизитов чертежа; техническая документация, чтение и перевод инструкций.
Говорение: презентация чертежа.);

Тема 1.3 Электронные устройства (Грамматический материал: герундий, инфинитив, Passive Voice, вопросительные конструкции, условные предложения (Zero conditional, First conditional).
Лексический материал: лексические единицы, обозначающие названия инструментов; суффиксальное словообразование терминологических единиц (reduce-reductor; digit-digital; condensecondenser); предлоги места.

Говорение: Group discussion: «Solving technical problems».);

Тема 1.4 Обслуживание и эксплуатация мобильной робототехники (Грамматический материал: условные предложения (Second and Third conditional).
Лексический материал: изучение и отработка лексики по теме «Обслуживание и эксплуатация мобильной робототехники»
Говорение: Тематическая ролевая игра);

Тема 1.5 Основные операции в профессиональной деятельности (Грамматический материал: фразовые глаголы (phrasal verbs).
Лексический материал: союзы и их употребление (and, but, than, because of).
Говорение: презентация на тему «Профессиональная деятельность».);

Раздел 2 Трудоустройство в международную компанию по специальности;

Тема 2.1 Речевой этикет (Грамматический материал: порядок слов в предложении (word order)
Лексический материал: формулы вежливости в диалоговом общении (could you, would you, if you don't mind).
Говорение: Telephone Talk; тематическая ролевая игра (собеседование при устройстве на работу).);

Тема 2.2 Составление резюме (Грамматический материал: порядок слов в предложении (word order)
Лексический материал: лексика и фразы, используемые при составлении резюме.
Говорение: Тематическая ролевая игра);

Раздел 3 Деловое общение с клиентами и партнерами;

Тема 3.1 Участие в переговорах в качестве специалиста (Грамматический материал: определенный артикль.
Лексический материал: диалоговые речевые клише
Говорение: диалог «Организация и участие в переговорах, деловых встречах. Ведение переговоров».);

Тема 3.2 Торговые операции (Грамматический материал: исчисляемые существительные
Лексический материал: тематическая лексика (invoice, order, shipment, brochure, leaflet, catalogue)
Говорение: презентация по теме «Торговля в разных странах».);

Тема 3.3 Ведение деловой переписки. (Грамматический материал: неисчисляемые существительные
Лексический материал: реквизиты и структура делового письма
Развитие навыков письменной речи: написание делового письма.);

Раздел 4 Представительство компании;

Тема 4.1 Структура компании (Грамматический материал: few-a few; little-a little
Лексический материал: корпоративная лексика (stuff, CEO, chief engineer, company, business integrity)
Говорение: презентация компании);

Тема 4.2 Финансовые операции (Грамматический материал: much-many
Лексический материал: тематическая лексика (account, share, shareholders, sales, profit, income, business strategy, loss)

Говорение: Group discussion: «The history of money», диалог «At the bank».);

Тема 4.3 Участие в совещании (Грамматический материал: Косвенная речь
Лексический материал: лексика и речевые клише по теме «Business meeting and agenda»
Говорение: диалог «Discussing budget planning»);

Тема 4.4 Участие в выставках в качестве специалиста (Грамматический материал: Косвенная речь
Лексический материал: лексика и речевые клише по теме «Business negotiation» «Advertisement».
Говорение: презентация оборудования);

Раздел 5 Работа над проектом «Инновационные разработки в робототехнике»;

Тема 5.1 Робототехника на производстве (Грамматический материал: косвенные вопросы
Лексический материал: лексика и речевые клише по теме «Modern inventions».
Говорение: презентация «Industrial robotics».);

Тема 5.2 Перспективы развития роботизированного производства (Грамматический материал: косвенные вопросы
Лексический материал: лексика и речевые клише по теме «Modern inventions».
Говорение: презентация «Innovative developments in robotics».).

11 Входной контроль

11.1 Цель входного контроля − определить начальный уровень подготовленности обучающихся и выстроить индивидуальную траекторию обучения. В условиях личностно-ориентированной образовательной среды результаты входного оценивания обучающегося используются как начальные значения в индивидуальном профиле академической успешности обучающегося.

11.2 Описание оценочных средств

Форма проведения входного контроля – тестирование.

Длительность тестирования – 10 минут.

Тестирование проводится в течение первых двух недель изучения учебной дисциплины.

Для проведения тестирования используются 10 вопросов из перечня тестовых заданий для входного контроля (для ответа на 1 вопрос, как правило, выделяется 1 минута).

Шкала оценивания результатов тестирования

За каждый правильный ответ выставляется 1 балл. Оценка выставляется в зависимости от процента правильных ответов:

Оценка формируется в соответствии с критериями таблицы:

Процент результативности (правильных ответов)	Оценка
86 до 100	«отлично»
от 67до 85	«хорошо»
от 50 до 66	«удовлетворительно»
менее 50	«неудовлетворительно»

Основываясь на результатах тестирования, формируется индивидуальная траектория обучающегося (группы обучающихся), исходя из следующих соображений:

– 86 – 100 % – обучающийся готов к изучению учебной дисциплины без дополнительного повторения изученного ранее материала;

– 50 – 67 % – обучающийся в целом готов к изучению учебной дисциплины, требуется повторение отдельных вопросов(тем) изученного ранее материала, необходимого для успешного освоения учебной дисциплины;

– 49% и менее – обучающийся имеет слабую подготовку к изучению учебной дисциплины, необходимы корректирующие занятия и консультации.

12 Текущий контроль

12.1 Рекомендации по оцениванию результатов тестирования обучающихся

Тестирование (бланковое или компьютерное с использованием СУО СибГИУ) проводится по изученным разделам (темам) учебной дисциплины для выявления уровня умений и знаний обучающегося, мотивирования обучающегося к активизации самостоятельной работы по усвоению учебного материала, выявления и устранения пробелов в знаниях, повышения дисциплины и организации учебной деятельности обучающегося.

Тестирование (бланковое или компьютерное с использованием СУО СибГИУ) проводится на практическом занятии или в рамках часов, отведенных на самостоятельную работу обучающихся. Перед тестированием обучающийся должен быть ознакомлен с правилами тестирования и критериями оценки. Длительность тестирования определяется количеством вопросов в тестовом задании (как правило, 10 – 20 вопросов из базы типовых тестовых заданий по изученным разделам (темам) учебной дисциплины): для ответа на 1 вопрос, как правило, выделяется 1-2 минуты.

При проведении текущего контроля в виде тестирования обучающемуся, как правило, предлагаются вопросы следующих типов:

– выбор только одного ответа. Обучающийся выбирает один из предложенных вариантов ответа. В случае выбора неправильного ответа обучающийся получает за данный вопрос 0 баллов; в случае правильного ответа – 1 балл;

– выбор одного или нескольких ответов. Обучающийся вправе выбрать любое непустое множество ответов. За каждый правильный ответ обучающийся получает определенное количество баллов (суммарная оценка всех правильных ответов на вопрос – 1 балл). При выборе хотя бы одного неправильного ответа обучающийся получает за данный вопрос 0 баллов;

– введение «короткого ответа» или «числового ответа». Обучающийся должен однозначно сформулировать требуемый ответ. В

случае ввода неправильного ответа обучающийся получает за данный вопрос 0 баллов; в случае правильного ответа – 1 балл;

– установление соответствия (ответ на каждый из нескольких вопросов должен быть выбран из списка возможных). Обучающемуся необходимо сопоставить друг другу несколько вариантов ответов. За каждый правильный ответ обучающийся получает 0,5 балла (итоговая оценка ответов на вопросы суммируется). При выборе хотя бы одного неправильного ответа обучающийся получает за данный блок вопросов 0 баллов;

– выбор пропущенных слов предполагает, что пропущенные слова в тексе заполняются с помощью выпадающего меню. В случае выбора неправильного ответа обучающийся получает за данный вопрос 0 баллов; в случае правильного ответа – 1 балл;

– «*перетаскивание на изображение*» (изображение или текст необходимо «перетащить» в зону на фоновом изображении), «*перетаскивание в текст*» (пропущенные слова в тексе заполняются с помощью перетаскивания) или «*перетаскивание маркеров*» (маркеры «перетаскиваются» на фоновое изображение). В случае хотя бы одного неправильного ответа обучающийся получает за данный вопрос 0 баллов; в случае правильного ответа – 1 балл.

Оценка формируется в соответствии с критериями таблицы:

Процент результативности (правильных ответов)	Оценка
86 до 100	«отлично»
от 67 до 85	«хорошо»
от 50 до 66	«удовлетворительно»
менее 50	«неудовлетворительно»

12.2 Рекомендации по оцениванию в процессе наблюдения за работой на практическом занятии

Наблюдение за работой на практическом занятии – важнейший компонент контроля деятельности обучающихся и качества их обучения.

Критерии оценки в процессе наблюдения за работой на практическом занятии:

– самостоятельность выполнения задания и работы с методическими указаниями (учитывается работа в течение занятия, быстрота и способность нахождения в методических указаниях нужной информации);

– правильность выполнения работы (учитывается последовательность выполняемых действий, умение работать с инструментами и/или средствами вычислительной техники);

– рациональность использования времени, отведенного на задание (не одобряется затянутость выполнения работы с учетом индивидуальных особенностей обучающихся);

– активность обучающегося при выполнении практической работы (учитывается индивидуальная работа и работа в группе).

Система оценивания двухуровневая.

Оценку «*зачтено*» получает обучающийся если он выполнил указанную в методических указаниях последовательность действий, получил результат, при выполнении практической работы проявил активность, самостоятельность; выделенное время использовал рационально.

Оценку «*не зачтено*» получает обучающийся, который не умеет самостоятельно работать с методическими указаниями, не может правильно выполнить указанную последовательность действий, не рационально использует отведенное время, Оценка «*не зачтено*» отмечает такие недостатки в подготовке обучающегося, которые являются серьезным препятствием к успешному овладению последующим материалом.

12.3 Рекомендации по оцениванию выполнения контрольно-тренировочных упражнений

Контрольно-тренировочные упражнения – упражнения / задания по грамматике и лексике, а также по развитию речевой деятельности, выполняемые студентами на практических занятиях с использованием справочников, словарей и методических указаний.

Критерии оценки грамматических/лексических упражнений

Процент выполнения	Баллы	Оценка
100-50%	50-25	зачтено
менее 50%	менее 25	не зачтено

12.4 Рекомендации по оцениванию перевода текста и работы с текстом

Перевод текста – очень краткое, сжатое изложение иноязычного текста, иноязычной статьи и т.д. или текстов, статей близкого содержания по специальности студента на родном языке. Данный вид работы выполняется студентами на практических занятиях.

Критерии оценки	Оценка
В переводе полностью отсутствуют смысловые искажения, неточности, неясности и вольности, нормативно-языковые (неграмотность) и узуальные ошибки. Перевод отражает основные мысли автора и стиль текста оригинала.	зачтено
В переводе имеются существенные смысловые искажения, нормативно-языковые ошибки, стиль текста оригинала нарушен.	не зачтено

12.5 Рекомендации по оцениванию диалога

Данный вид работы выполняется студентами на практических занятиях

Критерии оценки диалога – устной разговорной речи (максимальное количество баллов 10)

Баллы / Критерии	2	1	0
1.Содержание	Соблюден объем высказывания. Высказывание соответствует теме; отражены все аспекты, указанные в задании, стилевое оформление речи соответствует типу задания, аргументация на уровне, нормы вежливости соблюдены.	Не полный объем высказывания. Высказывание соответствует теме; не отражены некоторые аспекты, указанные в задании, стилевое оформление речи соответствует типу задания, аргументация не всегда на соответствующем уровне, но нормы вежливости соблюдены.	Незначительный объем высказывания, которое не в полной мере соответствует теме; не отражены некоторые аспекты, указанные в задании, стилевое оформление речи не в полной мере соответствует типу задания, аргументация не на соответствующем уровне, нормы вежливости не соблюдены.
2.Организация	Адекватная естественная реакция на реплики собеседника. Проявляется речевая инициатива для решения поставленных коммуникативных задач.	Коммуникация немного затруднена.	Коммуникация существенно затруднена, обучающийся не проявляет речевой инициативы.
3.Лексика	Лексика адекватна поставленной задаче и требованиям данного года обучения языку.	Лексические ошибки незначительно влияют на восприятие речи обучающегося.	Лексические ошибки значительно влияют на восприятие речи обучающегося.
4.Грамматика	Использованы разные грамматические конструкций в соответствии с задачей и требованиям данного года	Грамматические незначительно влияют на восприятие речи обучающегося.	Количество грамматических конструкций крайне ограниченно; значительное количество грамматических ошибок, в том

	обучения языку. Редкие грамматические ошибки не мешают коммуникации.		числе грубых.
5.Произношение	Артикуляцию говорящего легко понять; темп речи нормальный; звучание достаточно громкое; интонирование верно; речь звучит в естественном темпе, нет грубых фонетических ошибок.	Говорящего иногда сложно понять из-за неправильного произношения и/ли тихого голоса; речь иногда неоправданно паузирована; в отдельных словах допускаются фонетические ошибки (замена, английских фонем сходными русскими); общая интонация обусловлена влиянием родного языка.	Говорящего очень сложно понять; речь воспринимается с трудом из-за большого количества фонетических ошибок; интонация обусловлена влиянием родного языка.

В зависимости от количества набранных обучающимися баллов за диалог оценка ставится по следующей градационной сетке:

Количество набранных баллов	Оценка
5-10	зачтено
0-4	не зачтено

12.6 Рекомендации по оцениванию учебных заданий

Учебные задания – это форма учебной деятельности обучающегося, которая осуществляется под руководством и контролем со стороны преподавателя на практическом занятии с целью формирования знаний и умений. Одним из видов учебного задания является электронное письмо.

Электронное письмо – письмо, написанное другу или родственнику в дружеском стиле на иностранном языке в ответ на письмо-стимул, содержащее 3 вопроса.

Рекомендации по оцениванию электронного письма

Критерии оценки	Баллы	
Решение	2	- даны полные и точные ответы на три

коммуникативной задачи		заданных в письме-стимуле вопроса; - правильно выбрано стилевое оформление речи с учетом цели высказывания и адресата (обращение, завершающая фраза, подпись); - соблюдены принятые в языке нормы вежливости (в частности, есть благодарность за полученное письмо, упоминание о предыдущих и будущих контактах).
	1	- даны ответы на три вопроса, но на один вопрос дан неполный ответ (например, нет ответа на вопрос «почему», который является составной частью одного из вопросов) ИЛИ дан неточный ответ на один из вопросов; - есть 1-2 нарушения в стилевом оформлении (например, в выборе обращения) И/ИЛИ отсутствует благодарность за полученное письмо, упоминание о предыдущих или будущих контактах.
	0	- коммуникативная задача не решена: отсутствуют ответы на два/три заданных в письме-стимуле вопроса) - ИЛИ объем письма менее 90 слов.
Организация текста	2	- текст письма логично выстроен и правильно разделен на абзацы; - правильно использованы языковые средства для передачи логической связи; - оформление письма соответствует нормам письменного этикета, принятого в англоязычных странах.
	1	- текст письма в целом выстроен логично, но допущены ошибки в выделении абзацев; -И/ИЛИ имеются 1–2 ошибки при использовании средств логической связи; - имеются отдельные нарушения в оформлении письма: отсутствуют 1-2 элемента, характерных для оформления личного письма, например, отсутствует дата или неправильно написан адрес.

	0	- допущены многочисленные нарушения в логике письма; - И/ИЛИ оформление письма не соответствует нормам письменного этикета, принятого в англоязычных странах.
Лексико-грамматическое оформление высказывания	2	- использованная лексика и грамматические структуры соответствуют поставленной коммуникативной задаче; - употреблена разнообразная лексика, - используются простые и сложные грамматические структуры; -используются простые и сложные предложения; - допущено не более 4 языковых ошибок, не затрудняющих понимание; -ИЛИ языковые ошибки отсутствуют, но используется лексические единицы и простые грамматические структуры только элементарного уровня.
	1	- использованная лексика и грамматические структуры в целом соответствуют поставленной коммуникативной задаче; - употреблена лексика в основном элементарного уровня; - используются в основном простые грамматические структуры; - допущено не более 5 языковых ошибок, не затрудняющих понимание текста; -И/ИЛИ допущены языковые ошибки, которые затрудняют понимание текста письма (не более 1-2 ошибок)
	0	В письме допущены многочисленные языковые ошибки, затрудняющие понимание текста письма.
Орфография и пунктуация	2	- орфографические и пунктуационные ошибки отсутствуют; - ИЛИ допущены отдельные орфографические и пунктуационные ошибки (не более 2),

		которые не затрудняют понимание текста.
	1	- допущены орфографические и пунктуационные ошибки (не более 3-4), которые не затрудняют понимание текста.
	0	допущены многочисленные языковые ошибки, затрудняющие понимание текста письма (например, отсутствие точек в конце некоторых утвердительных предложений).

Шкала оценивания:
2 – критерий представлен в полном объеме
1 – критерий представлен частично
0 – критерий не представлен (отсутствует)

Процент выполнения	Баллы	Оценка
100-50%	12-5	зачтено
менее 50%	менее 5	не зачтено

13 Промежуточная аттестация

13.1 Оценочные материалы для промежуточной аттестации обучающихся по учебной дисциплине предназначены для оценки степени достижения запланированных результатов обучения по завершению изучения учебной дисциплины в установленной учебным планом форме и позволяют определить качество усвоения изученного материала.

Итоговой формой контроля сформированности компетенций у обучающихся по учебной дисциплине является: зачет (3-8 семестр).

Оценочные материалы для промежуточной аттестации обучающихся включают: зачет на основе результатов текущего контроля.

13.2 Оценивание обучающегося на зачете (зачтено/ незачтено)

Зачет проводится по результатам текущего контроля.

Таблица – Шкала оценивания обучающегося по дисциплине «Иностранный язык в профессиональной деятельности» по результатам текущего контроля

Оценка	Требования к знаниям
зачтено	Оценка «зачтено» выставляется обучающемуся при условии выполнения тестовых заданий в СУО СибГИУ в полном объеме и не менее 50% всех заданий в семестре, предусмотренных фондом оценочных средств по дисциплине.

Оценка	Требования к знаниям
не зачтено	Оценка «не зачтено» выставляется обучающемуся, если тестовые задания в СУО СибГИУ выполнены не в полном объеме, и если задания, предусмотренные фондом оценочных средств по дисциплине, выполнены в объеме менее 50%.

15 Материально-техническое обеспечение учебной дисциплины

Материально-техническое обеспечение учебной дисциплины включает учебные аудитории для проведения занятий всех видов, предусмотренных учебным планом, в том числе групповых и индивидуальных консультаций, текущего контроля и промежуточной аттестации, а также помещения для самостоятельной работы.

кабинет «Иностранного языка» для проведения практических занятий, оснащенный средствами обучения.
Демонстрационные учебно-наглядные пособия:
1) демонстрационные материалы;
2) словари.

Помещения для самостоятельной работы обучающихся оснащены компьютерной техникой с возможностью подключения к информационно-телекоммуникационной сети «Интернет» и обеспечением доступа в электронную информационно-образовательную среду.

Рабочая программа дисциплины составлена в соответствии с требованиями ФГОС СПО по направлению подготовки (специальности) 15.02.18 «Техническая эксплуатация и обслуживание роботизированного производства (по отраслям)».

Составитель(и):

преподаватель Григорьева Наталья Геннадьевна (университетский колледж).

Рабочая программа дисциплины рассмотрена и утверждена на Педагогическом совете Университетского колледжа.

Согласована:

доцент кафедры английского язы
преподавания НФИ КемГУ,
к.ф.н., доцент

Н.Ю. Киселёва

15. She saw him … (cross/to cross) the street.
16. I've decided ... (start) a new project.
17. She is trying ... (learn) Italian.
18. Can you ... (lend) me your dictionary, please?
19. Mother forgot ... (book) the tickets.
20. You shouldn't ... (argue) with your father.
21. Henry promised ... (help) her.
22. I really hope ... (get) an interesting job soon.
23. You must … (pay) for the service.
24. Let me ... (introduce) myself.

5. Find mistakes in the sentences.

1. The teacher made John to apologize.
2. What are you planning to eat for lunch?
3. That old car may not to cost much.
4. I don't want wait any longer.
5. My father promised buy new shoes for me.
6. I would like to try this shirt on.
7. We must to hurry up.
8. Mark was unable to do anything else.
9. They couldn't to fall asleep till midnight.

6. Open the brackets and use the verbs in Passive Voice.

Model**:** The term work (to finish) in time. –*The term work was finished in time.*

1. I (to give) an interesting book yesterday.
2. The flowers (to water) in the evening by my groupmate.
3. His new book (to write) next year.
4. A diploma of higher education (not to get) by Ben next month.
5. Glasgow university (to found) in 1450.
6. The last dictation (to write) without mistakes.
7. Computers (to sell) in shops all the year round.
8. My room (not to clean) every day.
9. Anew text (to translate) at the previous lesson.
10. Tea and coffee (to drink) by a lot of students every day.
11. Special meal (to cook) for his next birthday.
12. Presents (to buy) for all teachers annually.
13. 7,000 students (to train) for different specialities at Cambridge University.
14. This problem (to study) by two laboratories.

7. Transfer the sentences in Active Voice into Passive Voice.

Model: Shakespeare wrote “Romeo and Juliet” – “Romeo and Juliet” was written by Shakespeare.

1. Popov invented radio in Russia.
2. Every four years people elect a new president in the USA.
3. The police caught a bank robber last night.
4. Sorry, we don’t allow dogs in our safari park.
5. The postman will leave my letter by the door.
6. My mum has made a delicious cherry pie for dinner.
7. George didn’t repair my clock.
8. Wait a little, my neighbor is telling an interesting story.
9. My son can write some more articles about football.
10. You must clean your bedroom tonight.

8. Put the verb in the correct form (Conditional 0).

1. If you ____(to drive) along the river bank it ____ (to be) twenty miles out of your way.
2. If you ____(to take) your mobile phone into class, it ____ (must) be turned off.

8. If my dad … (find) his tools, he … (be able) to repair my bike.
9. If David … (not give up) smoking, Liza … (not marry) him.
10. Mary … (meet) her friends from Italy if she … (come) to the party.

4 семестр

Раздел 1 Тема 1.4 Обслуживание и эксплуатация мобильной робототехники

1. Put the verb in the correct form (Conditional 2).

1. If my mother came at seven, we (have) supper together.
2. They would stay indoors if the weather (be) sunny.
3. Where you would go if your mother (ask) you to buy some sugar and bread?
4. If my friend asked me, I (help) him.
5. He (write) a letter today if he had free time.
6. If they (take) a taxi, they would not miss the train.
7. If I (get) money, I (buy) this watch.
8. I (start) crying if you (leave) me along.
9. You (call) me up if you (come) back early.
10. I (finish) the work in time if you (stop) interrupting me.
11. If it (rain), we (stay) at home.
12. I (go) to Spain for two weeks if I (have) holidays.

2. Put the verb in the correct form (Conditional 3).

1. If you had had toothache, you (go) to the dentist.
2. Tom would have seen the Bolshoi Theatre if he (go) to Moscow.
3. If my sister had cleaned her room, I (take) her to the party.
4. Kate would have met you at the station if she (have) free time.
5. If James had washed the floor, he (play) computer games all evening.
6. My granny (visit) us if she had not been ill.
7. Harry (take) part in the concert if he (sing) well.
8. Children (play) football if they (do) their homework early.
9. If the weather (be) fine, we (go) camping.
10. If John (come) here, he (work) with us in the garden.
11. Susan (enjoy) music if she (go) to the concert.
12. I (buy) a new car, if I (earn) a lot of money.

Раздел 1 Тема 1.5 Основные операции в профессиональной деятельности

1.Match the verbs (in the left column) with the nouns(in the right column) and make your own sentences.

Verbs	Nouns
1 .go to/enter/be enrolled into/graduate from	a) a course in/notes
2. read for/take/pass	b) good at Maths
3. do/study	c) research into/on
4. take/make	d) university
5. get/receive	e) a subject/course
6. make	f) in discussion
7. be	g) grant/degree
8. take part	h) exams
9. do/conduct/carry out	i) progress

10. give/do j) a lecture

2. Complete the sentences with the words from the box

practice, take, head, academic, general, lasts, departments, universities, students, interesting

1. There are many___ in Moscow.
2. The ___ of a university is Rector.
3. Each faculty has a number of specialized___ .
4. The course of studies ___ 4-6 years.
5. The___ year begins on the 1-st of September.
6. Students___ exams at the end of each semester.
7. Only good___ get grants.
8. The first- and second-year students study___ engineering subjects.
9. Theory is accompanied by___.
10. It is___ but difficult to study at the university.

3. Match the words:

a) antonyms

1. to begin a. to graduate from
2. to enter b. slow
3. young c. little
4. large d. few
5. to open e. short
6. to take f. to finish
7. quick g. old
8. much h. small
9. many i. to close
10. long j. to give

b) synonyms

1. new a. to construct
2. large b. to make
3. to begin c. to start
4. to take d. major
5. to speak e. to talk
6. to enter f. big
7. to build g. many
8. much h. to get
9. to do i. modern
10. main j. to come into

Задание 2. Прочитайте и переведите на русский язык текст "Robotic production technical operation and maintenance”

Задание 3. Прочитайте и переведите на русский язык текст “Mechatronics and Mobile robotics”

Задание 4.Read the text and answer the questions after it.

English as a World Language

The modern world is becoming smaller all the time. Every day distances between different countries seem less. For this reason it's becoming more and more important to know different languages, especially English. One billion people speak English today. That's about 20% of the world's population.

400 million people speak English as their first language. For the other 600 million people it's either a second language or a foreign language. English is the first language in the United Kingdom, the United States of America, Australia and New Zealand. It is one of the official languages in

Canada, the Irish Republic and the Republic of South Africa.

As a second language English is spoken in more than 60 countries. It is used by the government, businessmen and universities. English is the language of politics and diplomacy, science and technology, business and trade, sport and pop music.
80% of all information in the world's computers is in English.
75% of the world's letters and faxes are in English.
60% of all international telephone calls are made in English.
More than 60% of all scientific journals are written in English.

To know English today is absolutely necessary for every educated person, for every good specialist. Learning a language is not an easy thing. It's a long and slow process that takes a lot of time and patience. But it's a must.

English is taught throughout the world and a lot of people speak it quite well. In our country English is very popular: it is studied at schools (sometimes even at nursery schools), colleges and universities. We all need to understand each other. To do that we need an international language, and that's English.

English is a world language. It is the language of progressive science and technology, trade and cultural relations, commerce and business. It's the language of international aviation, shipping and sports. It's also the major language of diplomacy. Geographically it is the most widespread language on earth, second only to Chinese in the number of people who speak it hearing a foreign language is not an easy thing. It's a long and slow process that takes a lot of time and practice. A foreign language is not just a subject learnt in the classrooms. It's something which is used in real life situations.

There are many reasons why we begin to study foreign languages. First of all it's an effective medium of international communication. I'm convinced if we are working in any brunch of science we must read books and magazines in other languages. Learning foreign languages opens up opportunities and careers that didn't even exits some years ago. Knowing foreign languages can help us to find a job in such fields as science and technology, foreign trade and banking, international transportation communication, teaching librarian science and others. A more general aim is to make our intellectual and cultures. Learning a foreign language including learning also culture, traditions and mode of thought of different people. Of course speaking and writing in a foreign language is a difficult art and it has to be learned. Needless to say that English has become very popular today. About 350 million people speak English as its first language.

As for me, I'm completely convinced that to know a foreign language is absolutely necessary for all educated person and modern specialists. Everything depends on our own efforts.

Questions:

1. When did you begin learning English?

2. It is easy to learn foreign languages?
3. Which language in the world is spoken by most people?
4. Why is it necessary to learn English?
5. Why is English not an easy language to learn?
6. What advantages have the people who know foreign languages?
7. What was the process of learning?

Задание 5.Прочитайте и переведите на русский язык текст «Workplace Safety»

Раздел 1 Тема 1.2 Чтение чертежей и технической документации на английском языке.

Задание 1. Прочитайте и переведите на русский язык текст «Measuring instrument»
Задание 2. Прочитайте и переведите на русский язык текст «Safe Working Load (SWL)»

Раздел 1 Тема 1.3 Электронное оборудование

Задание 1. Прочитайте и переведите на русский язык текст “The Age of Electronics”

The Age of Electronics

The discovery of the electron, and the investigations into its nature which followed, led to a revolution in physical science. The revolution in pure science rapidly bore fruit1 in many fields of applied science and technology, especially in the applied science of electronics. The vacuum techniques developed for the study of free electrons and cathode rays led directly to the radio valve and the television receiver. The new electronics combined with the older techniques of the telegraph and telephone produced a revolution in communications on a world scale. If the discovery of the electron had led only to radio and television it would still represent a decisive factor in the shaping of our civilization – but it led to much more.

Electronics produced radar. It led to nucleonics and hence to the exploitation of the immense store of energy locked in the atom. It gave birth to the electronic the middle of the twentieth century a rapidly expanding, world-wide electronics industry was pouring out millions of parts for radio and television receivers and instruments for every branch of science and technology – instruments capable of unprecedented speed and sensitivity.

Electronic devices give immense extension to our senses. We can now examine structures too small to be visible in even the most powerful optical microscope and receive signals from radio stars which started their long journey through space ages before there was any life on our planet. Electronics combined with rocketry has enabled scientists to take close-up

pictures4 of the moon. Electronics applied to medicine has already produced significant advances in diagnosis and treatment.
Electronics plays the leading role in automation which is generating a second industrial revolution of wider social significance than the first.
Electronics has also given birth to cybernetics which offers, for the first time in history, an effective science of government based on adequate information and communication.
It seems very probable that electronics will dominate technology even in the distant future.
Notes
1. to bear fruit – приносить плоды, давать результаты
2. to give birth – родить, породить
3. unprecedented speed and sensitivity – небывалая скорость и чувствительность
4. to take close-up pictures – делать снимки с близкого расстояния

Задание 2. Say whether the following statements are true or false:
1. The revolution in pure science rapidly bore fruit in many fields of applied science and technology. 2. The new electronics produced a revolution in communications. 3. The discovery of the electron led to a revolution only in physical science. 4. Electronics doesn't play the leading role in automation.
Задание 3. Answer the following questions on paragraph 2:
1. What did electronics produce? 2. What did it lead to? 3. What did it give birth to? 4. What was electronics industry pouring out by the middle of the twentieth century?
Задание 4. Translate paragraph 3 into Russian.
Задание 5. Read paragraph 4 and say where electronics plays the leading role.
Задание 6. In paragraph 2 find the English equivalents of the following words:
электроника, радар, запас, электронная вычислительная машина, часть, прибор, телевизионный приемник, отрасль, чувствительность, технология, производить.
Задание 7. Skim through text B and choose the best title for it:
1. Electronics in Industry.
2. Electronics and the Second Industrial Revolution.
3. General Uses of Electronics.

Text B

Electronics is the science or practice of using electricity in devices similar to transistors and radio tubes so as to get results not possible with ordinary electrical equipment.
Most persons know how electric current flows in motors and transformers; here the electricity always flows in the copper wire or other metal parts. When electricity passes through space as occurs within a tube, such action is called electronic. More recently, when layers of semiconductor metals are joined

together so that current flows through the junction in one direction only, as in a solid-state diode or a transistor, such action is also called electronic. If a device passes its stream of electrons through internal space, or through the junction where certain different metals meet, the device is called electronic.
Without electronics there might be no radio, television, sound pictures or long-distance telephone calls. Most of these familiar equipments serve to carry or give information; so communication early was a main purpose of electronics and still holds interest of many workers and students in this field.
Meanwhile industry seeking faster and more accurate methods of production has adapted electronic equipment to its own needs. Gradually during the past fifty years industrial plants have installed electronic equipment to give better operation of motors along with control of varied operations.
Some people believe that electronic devices can hear, see, feel, smell or even think; this is true only when the sound, image, feeling or thought can be changed into electrical signal, to which the transistor or tube-operated device1 can then respond. Much of the success of electronics depends on the methods used to obtain an electric signal that can be used to stimulate the electronic device into action2. The electronic circuit can be made to detect such a signal, increase its strength and put it to useful work3.
Notes
1.tube-operated device – прибор, управляемый электронной лампой
2.to stimulate into action – побуждать к действию
3.to put to useful work – заставить выполнять полезную работу

Задание 8. Answer the following questions:
1. What is electronics? 2. What device is called electronic? 3. What was a main purpose of electronics? 4. What has industry adapted to its own needs?
Задание 16. Give the main points of text B in 4-5 sentences.
Задание 17. Scan the text and find the information about the uses of vacuum tubes.

Vacuum Tubes

The science of electronics now deals almost exclusively with transistors and other solid-state devices. However, vacuum tubes were the principal building blocks1 of electronic circuits until approximately 1955. Briefly, a vacuum tube .consists of several metal electrodes of various shapes all packaged inside a glass or metal envelope2 which is highly evacuated. Vacuum tubes are often called thermionic "valves". A red hot metallic electrode (the filament or cathode) emits electrons which are attracted to a positively charged electrode called the plate or anode. The electrons pass through the spaces in a metallic grid electrode on their way to the plate, and the voltage on the grid controls how many electrons reach the plate. A simple thermionic valve is called a diode because it has two electrodes. A triode is a valve with three electrodes, an anode, a cathode and a control grid. A tetrode has four, and a pentode – five electrodes.

Vacuum tubes are still used in oscilloscopes, television sets, high power high frequency radio transmitters, and in some special low noise amplifiers. However, every year sees a larger number of applications being transistorized. It is probably safe to say that this trend will continue in the future, as there is presently a great deal of technological development being put into solid state electronics and rather little put into vacuum tube electronics.

As a general rule, vacuum tubes are inferior to modern solid state devices3 in many ways. Vacuum tubes are much larger. They require considerably more electric power to operate. However, they can handle high voltages and high powers4 at high frequencies somewhat more easily than solid state devices. They are also capable of withstanding temporary overloads5 in voltage or current which would permanently destroy6 a solid state device and then returning to normal operation.

Notes

1. principal building blocks – основные стандартные блоки
2. packaged inside an envelope – заключенный в баллон
3. inferior to modern solid state devices – уступают современным твердотельным приборам
4. to handle high voltages and high powers – оперировать высоким напряжением и высокой мощностью
5. to withstand temporary overloads – выдерживать временные перегрузки
6.would permanently destroy – неизменно разрушает

Задание 9. Study the text. Try to understand all details. Use a dictionary if necessary:

Transistors and Semiconductor Devices

Devices consisting of solid pieces of crystalline material which allowed alternating current to flow more readily in one direction than the other were known long before the invention of the thermionic valve. The crystal set1 which became so well known in the early days of radio depended on the rectifying action at the point of contact between the surface of certain crystals and a fine wire. Crystal valves2, using silicon crystals, were found to be more efficient for the very high frequency signals reaching radar receivers than any thermionic valves. The action of these devices was not understood, but they were all made from materials which we now classify as semiconductors: substances which let electric current pass through them more easily than insulators do but much less easily than do true conductors. These semiconductor devices were used as rectifiers although by 1924 a scientific worker at the laboratory headed by Bonch-Bruyevich in Nizhni Novgorod Oleg Losev for the first time in the history of electronics had achieved amplification using a semiconductor crystal. Unfortunately, Losev's discovery did not receive due attention.

In 1948 Bardeen and Brattain invented the point-contact transistor and Shockley invented the junction transistor shortly after. The transistor is a

semiconductor triode possessing characteristics which are similar in many respects to those of thermionic triodes. At present transistors are widely used in amplifiers, receivers, transmitters, oscillators, TV sets, measuring instruments, pulse circuits, computers, and many other types of radio equipment.

The invention of transistors and solid-state devices led to an acceleration in the growth of electronics. Why were these new devices so important and why are they steadily replacing their older equivalents? A brief review of their advantages compared with thermionic devices will provide the answers to these questions. Transistors are made from parts which do not wear out. Transistors waste very little power. They require no heating to generate their free electrons. This means that equipment made with transistors is more efficient, lighter than comparable valve equipment.

Since no heating is required there is no delay in transistor equipment waiting for things to warm up, as there is with thermionic valves. This is a great advantage with 'entertainment' equipment, such as radio and television receivers, and it may be vital with some kinds of measuring or recording equipment.

Their very small size and weight, combined with low heat dissipation3, permits very high density packing of components and, in combination with their reliability, this has made possible the design of the very compact circuits which are essential for such applications as computers, portable measuring instruments, satellite instrumentation, etc.

Notes

1.crystal set – детекторный приемник

2.crystal valve – кристаллический прибор

3.heat dissipation – рассеяние тепла

Задание 10. Say whether the following statements are true or false:

1. Devices consisting of crystalline materials were known long before the invention of the thermionic valve. 2. The crystal set became known in the early days of radio. 3. Crystal valves were found to be less efficient rectifiers than thermionic valves. 4. The action of semiconductor devices was understood well.

Задание 11. Answer the following questions on paragraph 2:

1. What is a transistor? 2. When was the first transistor invented? 3. Where are transistors used?

Задание 12. In paragraph 3 find the English equivalents of the following words:

транзистор, твердотельный прибор, ускорение, рост, прибор, заменять, неуклонно, краткий, преимущество, сравнивать, давать ответы.

Задание 13. Translate paragraph 4.

Задание 14. Read paragraph 5 and say where the small size and weight of transistors is essential.

Задание 15. Write out of the text the words and phrases describing the transistor.
Задание 16. Skim through the text and say what it is about (you are given 10 minutes):

Integrated Circuits

An integrated circuit (IC) is a collection of interconnected transistors, diodes, resistors, and capacitors mounted in one package or case with as many as fourteen leads.
The word "integrated" does not refer to the mathematical process of adding together an infinite number of infinitesimally small terms, but rather to the fact that all transistors, diodes, and resistors are formed from a single piece of semiconductor material called a "chip" or a "die". If only one chip is present in the case, the IC is called "monolithic"; if several chips are mounted inside the case the IC is called "hybrid". Some integrated circuits contain several thousand transistors and resistors, and so extreme miniaturization is possible. Because of their extremely small size, integrated circuits tend to be restricted to low power applications. Their small size, however, does enable them to operate at high frequencies. The cost of an IC is considerably less than the total cost of the separate components.
Monolithic ICs are by far the most common, but there are other kinds. Thin-film and thick-film ICs are larger than monolithic ICs but smaller than discrete circuits. With a thin– or thick-film IC, the passive components like resistors and capacitors are integrated simultaneously on a substrate. Then, discrete active components like transistors and diodes are connected to form a complete circuit. Therefore, commercially available thin– and thick-film circuits are combinations of integrated and discrete components1.
If only a few components have been integrated to form the complete circuit it is an example of small-scale integration (SSI)2. As a guide, SSI refers to ICs with less than 12 integrated components.
Medium-scale integration (MSI)3 refers to ICs that have from 12 to 100 integrated components per chip. Large-scale integration (LSI)4 refers to more than a hundred components.
The IC is becoming more important as a component to be used in the design of electronic equipment, not only in equipment that must be small and light in weight, but where reliability and performance are demanded. In many areas of application particularly in digital computers, the IC provides more economical designs.
A number of important new developments are being evaluated both in the laboratory and in limited product usage. Some of these promise to bring about significant changes in the way microcircuits are designed and used.
Notes
1.discrete component – дискретный компонент
2.SSI (small-scale integration) – малая интегральная схема
3.MSI (medium-scale integration) – средняя интегральная схема
4.LSI (large-scale integration) – большая интегральная схема

Задание 17. Answer the following questions:
1. What is an integrated circuit? 2. What does the word 'integrated' mean? 3. What types of integrated circuits are known to you? 4. What is large scale integration?
Задание 18. Scan the text and find the answers to the following questions:
1.What is a major trend in modern radio electronics?
2.What possibilities does molecular electronics open up?

From Radio Valves to Cosmic Communications

The reduction of radio instruments to miniature proportions and even smaller – is a major trend in modern radio electronics. The significance of this research has grown especially in connection with space research. It is impossible to equip a rocket for flights to other worlds without light, small and economical electronic apparatuses. The space rockets will carry a large amount of miniature equipment, systems for contact with the Earth, radars, computers for calculating flight trajectories, life-support systems, etc.
Bulky electronic equipment will have no place in the future. It will be unsuitable for automation of production, transport or domestic use.
Semiconductors and printed circuits have helped to reduce the size of apparatus considerably. The semiconducting instruments which have replaced electronic valves are much smaller and lighter, consume less power, are reliable and more durable.
The development of micromodules – tiny ceramic plates with a metallized coating – has opened up big possibilities for making miniature electronic instruments. Semiconductors compressed into this plate are hundreds of times smaller than electronic valves. A radio receiver assembled of micromodules does not weigh more than 50 grammes.
Molecular electronics opens up new possibilities. The crystalline lattice can be changed by tantalum or titanium being added to semiconductors to obtain crystals with the required electrical properties.
At present, a radio-receiving set is assembled of separate, ordinary-size parts. The radio sets based on semiconductors or micromodules are also assembled of separate parts but tens and hundreds of times as small. The germanium or silicon plates will not operate like separate resistors or condensers, but as complete circuits – as generators or amplifiers.
All this might sound fantastic, but a scientist is looking still further ahead. Present research programmes are taking the development of even more miniature parts. We can say that when superminiature elements are developed, it will become possible to place approximately 200 million of these "parts" within one cubic centimetre. The density is approximately that of the human brain.
Cybernetics machines assembled of these units will memorize tremendous volumes of information and will give man invaluable assistance in diverse fields of life.
Задание 19. Find the information about semiconductor instruments.

Задание 20. Think of the most suitable title for paragraph 3 out of the given ones:
1.Miniaturization.
2.Semiconductor Devices – a Big Step in the Direction of Miniaturization.
3.Steps of Miniaturization.

Раздел 1 Тема 1.4 Обслуживание и эксплуатация мобильной робототехники

Задание 1. Read the text.

Robots in manufacturing

Today most robots are used in manufacturing opera¬tions. The applications of robots can be divided into three categories:
1. material handling
2. processing operations
3. assembly and inspection.

Material-handling is the transfer of material and load¬ing and unloading of machines. Material-transfer appli¬cations require the robot to move materials or work parts from one to another. Many of these tasks are relatively simple: robots pick up parts from one conveyor and place them on another. Other transfer operations are more complex, such as placing parts in an arrangement that can be calculated by the robot. Machine loading and un¬loading operations utilize a robot to load and unload parts. This requires the robot to be equipped with a gripper that can grasp parts. Usually the gripper must be designed specifically for the particular part geometry.

In robotic processing operations, the robot manipu¬lates a tool to perform a process on the work part. Exam¬ples of such applications include spot welding, continu¬ous arc welding and spray painting. Spot welding of au¬tomobile bodies is one of the most common applications of industrial robots. The robot positions a spot welder against the automobile panels and frames to join them. Arc welding is a continuous process in which robot moves the welding rod along the welding seam. Spray painting is the manipulation of a spray-painting gun over the sur¬face of the object to be coated. Other operations in this category include grinding and polishing in which a ro¬tating spindle serves as the robot's tool.

The third application area of industrial robots is as¬sembly and inspection. The use of robots in assembly is expected to increase because of the high cost of manual labour. But the design of the product is an important aspect of robotic assembly. Assembly methods that are satisfactory for humans are not always suitable for ro¬bots. Screws and nuts are widely used for fastening in manual assembly, but the same operations are extremely difficult for an one-armed robot.

Inspection is another area of factory operations in which the utilization of robots is growing. In a typical inspection job, the robot positions a sensor with respect to the work part and determines whether the part answers the quality specifications. In nearly all industrial robotic applications, the robot provides a substitute for human labour. There are certain characteristics of industrial jobs performed by humans that can be done by robots:
1. the operation is repetitive, involving the same ba¬sic work motions every cycle,
2. the operation is hazardous or uncomfortable for the human worker (for example: spray painting, spot weld¬ing, arc welding, and certain machine loading and un¬loading tasks),
3. the workpiece or tool is too heavy and difficult to handle,
4. the operation allows the robot to be used on two or three shifts.

Задание 2. Answer the following questions:
1. How are robots used in manufacturing?
2. What is «material handling»?
3. What does a robot need to be equipped with to do loading and unloading operations?
4. What does robot manipulate in robotic processing operation?
5. What is the most common application of robots in automobile manufacturing?
6. What operations could be done by robot in car manufacturing industry?
7. What are the main reasons to use robots in production?
8. How can robots inspect the quality of production?
9. What operations could be done by robots in hazardous or uncomfortable for the human workers conditions?

Задание 3. Read and translate the text.

Industrial Robots Applications

The ISO 8373:2012 defines an industrial robot as "an automatically controlled, reprogrammable, multipurpose manipulator, programmable in three or more axes, which can be either fixed or mobile for use in industrial automation application." Within the manufacturing industry, however, we consider industrial robots as labor that can perform dangerous or repetitive tasks required for manufacturing operation with a high degree of accuracy.
The first industrial robot, Unimate, joined the assembly line at the General Motors plant in Ewing Township, New Jersey, in 1961. It was an automated die-casting mold that released blistering-hot door handles and other auto parts into vats of cooling liquid on a production line that moved them along to workers for final finishing and buffing.
The programmability of industrial robots was largely a tool that could allow them to be used for a variety of different tasks, but it didn't really give them intelligence. They completed monotonous and unsafe tasks and were

deployed for their precision and repeatability. As a result, the automotive industry has been the most important customer of industrial robots since 2010, according to the International Federation of Robotics.

Here are the specific tasks traditional industrial robots are designed to perform:

1. Arc Welding

Arc welding, or robot welding, became commonplace in the 1980s. One of the driving forces for switching to robot welding is improving the safety of workers from arc burn and inhaling hazardous fumes.

2. Spot Welding

Spot welding joins two contacting metal surfaces by directing a large current through the spot, which melts the metal and forms the weld delivered to the spot in a very short time (approximately ten milliseconds).

3. Materials Handling

Material handling robots are utilized to move, pack and select products. They also can automate functions involved in the transferring of parts from one piece of equipment to another. Direct labor costs are reduced and much of the tedious and hazardous activities traditionally performed by human labor are eliminated.

4. Machine Tending

Robotic automation for machine tending is the process of loading and unloading raw materials into machinery for processing and overseeing the machine while it does a job.

5. Painting

Robotic painting is used in automotive production and many other industries as it increases the quality and consistency of the product. Cost savings are also realized through less rework.

6. Picking, Packing and Palletizing

Most products are handled multiple times prior to final shipping. Robotic picking and packaging increases speed and accuracy along with lowering production costs.

7. Assembly

Robots routinely assemble products, eliminating tedious and tiresome tasks. Robots increase output and reduce operational costs.

8. Mechanical Cutting, Grinding, Deburring and Polishing

Building dexterity into robots provides a manufacturing option that is otherwise very difficult to automate. An example of this is the production of orthopedic implants, such as knee and hip joints. Buffing and polishing a hip joint by hand can normally take 45-90 minutes while a robot can perform the same function in just a few minutes.

9. Gluing, Adhesive Sealing and Spraying Materials

Sealer robots are built with numerous robotic arm configurations that enable the robot to apply adhesives to any type of product. The primary benefit in this application is increased quality, speed and consistency of the final product.

10. Other Processes
These include inspection, waterjet cutting and soldering robots.

Robotics and manufacturing

Robotics and manufacturing are a natural partnership. Robotics play a major role in the manufacturing landscape today. Automated manufacturing solutions should be a key part of any operation that strives for maximum efficiency, safety and competitive advantage in the market. Manufacturing robots automate repetitive tasks, reduce margins of error to negligible rates, and enable human workers to focus on more productive areas of the operation.

Robots used in manufacturing fill numerous roles. Fully autonomous robots in manufacturing are commonly needed for high-volume, repetitive processes — where the speed, accuracy and durability of a robot offers unparalleled advantages. Other manufacturing automation solutions include robots used to help people with more intricate tasks. The robot executes components of the process such as lifting, holding and moving heavy pieces.

Robotic process automation in manufacturing allows companies to remain competitive globally — offering an efficient, viable alternative to offshoring and fulfilling the skills gap in areas where it may be difficult to recruit the necessary employees. Manufacturing robots enable employees to focus on innovation, efficiency and other, more intricate processes that ultimately lay the groundwork for growth and success. With a dedicated manufacturing automation solution in place, you can see increased productivity, improved worker safety and satisfaction, and a better bottom line.

Five Reasons to Use Robotics in Manufacturing:

1. Robots used in manufacturing create efficiencies all the way from raw material handling to finished product packing.
2. Robots can be programmed to operate 24/7 in lights-out situations for continuous production.

3. Robotic equipment is highly flexible and can be customized to perform even complex functions.
4. With robotics in greater use today than ever, manufacturers increasingly need to embrace automation to stay competitive.
5. Automation can be highly cost-effective for nearly every size of company, including small shops.

Задание 6. Are these sentences true or false?
1. Robotics doesn't play an important role in the production nowadays.
2. Due to manufacturing robots human workers can focus on more productive areas of the operation.
3. For high-volume, repetitive processes fully autonomous robots in manufacturing are not needed.
4. Manufacturing robots don't allow employees to focus on innovation, efficiency and other tasks.
5. Robotic equipment is highly flexible and can perform even complex functions.

Задание 7. Fill the blanks using the following words:
industrial robots, wheeled, move materials, moving, mobile robot research, sensors, guidance devices, mobile robots, controller, autonomous

A mobile robot, is a robot that is capable of … in the surrounding. Mobile robots can be … (AMR - autonomous mobile robot) which means they are capable of navigating an uncontrolled environment without the need for physical or electro-mechanical guidance devices. Alternatively, mobile robots can rely on … … that allow them to travel a pre-defined navigation route in relatively controlled space (AGV - autonomous guided vehicle). By contrast, … … are usually more-or-less stationary, consisting of a jointed arm (multi-linked manipulator) and gripper assembly, attached to a fixed surface.
Mobile robots have become more commonplace in commercial and industrial settings. Hospitals have been using autonomous … … to move materials for many years. Warehouses have installed mobile robotic systems to efficiently … … from stocking shelves to order fulfillment zones. Mobile robots are also a major focus of current research and almost every major university has one or more labs that focus on… … …. Mobile robots are also found in industrial, military and security settings.
The components of a mobile robot are a controller, sensors, actuators and power system. The … is generally a microprocessor, embedded microcontroller or a personal computer (PC). The … used are dependent upon the requirements of the robot. The requirements could be dead reckoning, tactile and proximity sensing, triangulation ranging, collision avoidance, position location and other specific applications. Actuators usually refer to the motors that move the robot can be … or legged. To power a

mobile robot usually we use DC power supply (which is battery) instead of AC.

Задание 1. Прочитайте и переведите на русский язык текст «Kinds of Companies»

Kinds of Companies

There are many kinds of companies: private companies, family-owned and multinational companies. They work in different business sectors: transport, engineering, retailing, construction, tourism, banking etc. Peugeot, for instance, is a French car manufacturer which supplies cars. Bacardi Martini is a Spanish drinks supplier which supplies champagne and vine. Microsoft is an American IT-company, which developing Windows operating system and other software.

I would like to say some words about Microsoft. This company was founded by Bill Gates in late 70s. Being one of the most successful and profitable companies in the world, they spend a lot on charity. Bill and his wife Melinda opened Melinda and Bill Gates Foundation organization, which helps poor citizens of Africa staying alive.

So, if you want to be as successful as Bill you should follow these tips:

- start with a simple business idea that is easy to understand
- have some good designers who also understand production
- have a strong company culture

Those are only basic keys and of course, what works for one person may not work for others.

Задание 1. Прочитайте и переведите на русский язык текст «History of Trade»
Задание 2. Read the text and answer the questions.

Trade

Trade happens because people need or want things that they don't have. We also trade for work that we cannot do ourselves. Trade between countries happens for the same reason. Some countries, for example, have natural resources, like coal, oil or wood which other countries might want to buy. They try to sell the goods, products or services that they have too much of to other countries. They earn money from these sales and then can buy the things that they themselves need and cannot produce on their own.
Both producers and consumers profit from international trade. If countries can produce goods more cheaply than others because they specialize on them why not let them. They make more money on one side and consumers in other countries can buy goods that are cheaper.
Even though many nations have a lot of different goods to export there are countries that depend only on one or two products to get money. Saudi Arabia, Kuwait and other countries of the Middle East depend on oil exports, because it is pretty much the only thing that they can sell. Poor countries in Africa depend largely on the export of tropical farm products to get money.
Each year goods and services worth about 11 trillion dollars ($ 11 000 000 000 000) are traded all over the world. The biggest exporting nations are The United States, France, Germany, the United Kingdom, Canada and Japan.
The difference between what a country exports and what it imports is called the balance of trade. If a country exports more than it imports we call this a trade surplus. And if a country pays more for its imports than it gets for its exports it has a trade deficit.
Questions:
1. Why do people trade?
2. Why is international trading very important?
3. Who gets profit from international trade?
4. What are the biggest exporting countries?
5. What is the balance of trade?

Задание 1. Read, translate the text and answer the questions.

Glimpses of History of Money

At different periods of time and in different parts of the world many different commodities have served as money. These commodities were: cattle, sheep, furs, leather, fish, tobacco, tea, salt, shells etc. The experts underline that to

serve effectively as money; a commodity should be fairly durable, easily divisible, and portable. None of the above-mentioned commodities possessed all these qualities, and in time they were superseded by precious metals. First they were superseded by silver and later by gold. When a payment was made the metal was first weighed out. The next stage was the cutting of the metal into pieces of definite weight and so coins came into use.

Paper money first came into use in the form of receipts given by goldsmiths in exchange for deposits of silver and gold coins. After goldsmiths became bankers their receipts became banknotes. That's how the first banknotes came into existence. At first coins were worth their face value as metal. But later token coins of limited value as legal tender were issued. Now smaller denomination coins are made from bronze and are often referred to as coppers. Bigger denomination coins are made from cupronickel and are usually called silver.

Questions:

1. What commodities served as money in the past?
2. What are the requirements of a commodity to serve as money?
3. Why did precious metals start to serve as money?
4. What precious metal was used first to serve as money?
5. What precious metal was used then?
6. How did coins come into existence?
7. How did paper banknotes come into existence?
8. What coins are called silver?
9. What are coppers?

8 семестр

Раздел 4 Тема 4.3 Участие в совещании

Задание 1. Прочитайте и переведите на русский язык текст «Negotiations»

Negotiations

Negotiations are complex because one is dealing with both facts and people. It is clear that negotiators above all must have a good understanding of a subject. They must be aware of the company`s general policy, initial bargaining position as well as fallback position.

However, awareness of these facts may not necessarily suffice to reach the agreement. The role of human factor must be taken into account. The approach and strategy in negotiations are influenced by cool, clear logical analyses. But the personal needs of the actors must therefore be considered. These needs might include the need for friendship, goodwill, credibility, recognition of status and authority, a desire to be appreciated and promoted as well as the need to get home earlier on Friday evening.

Researches, who have studied negotiations, recommend separate people from facts. Moreover, while negotiations indirect and impersonal forms

should be used. Furthermore, a really tough negotiator should be hard on the facts but soft on the people.

Language also varies according to negotiating style adopted: it can be either a co-operative or a competitive mode. Cooperative style is based on win-win principles when both parties want to benefit from the deal. This style is often accepted within one company or between companies with longstanding relations when common goals are being pursued.

Competitive negotiation style can be appropriate for one-off contracts when the aim is to get the best results possible without considering future relations and risks of the breakdown of negotiations. Moreover, the language can become hostile and threatening.

In reality negotiations are a complex mode of co-operative and competitive styles. Negotiating successfully implies dealing with four main components of negotiations: people, facts, co-operation and competition.

Раздел 4 Тема 4.4 Участие в выставках в качестве специалиста

Задание 1. Прочитайте и переведите на русский язык текст «History of Advertising»

History of Advertising

To advertise means to make information public. But nowadays advertising doesn't limit itself by a word 'publicity'. Modern advertising has a task to show a product in a positive and pleasant way. It has an aim to make us want to buy it. But how and when did advertising appear?

The advertisement has existed since antiquity time. At first there were murals that informed about gladiator fights. In the middle Ages public heralds stood in the centre of the city and gave last news.

In the 15th century there was a good development of printing. After that posters and leaflets appeared. Two centuries later the first newspapers began to publish advertisements. But it is the 20th century when advertising really explodes. It followed the invention of radio and TV.

In the United States companies have worked with advertisers since 1930. They invented packaging that had to attract customers. They also created an idea of product placement. It means that a product is shown in the movies. After that it gets well-known and well-sold. For example, it was made with the luxury cars which were shown in James Bond films.

Nowadays the new territory of commercials is Internet with social networks. Small software called cookies allows offering ads according to the tastes of Internet users. Certainly, in the near future the commercial advertising will be personalized for each of us.

Раздел 5 Тема 5.1 Робототехника на производстве

Задание 1. Read and translate the text.

Computer process control

In computer process control, a digital computer is used to direct the operations of a manufacturing process. Although other automated systems are typically controlled by computer, the term computer process control is generally associated with continuous or semicontinuous production operations involving materials such as chemicals, petroleum, foods, and certain basic metals. In these operations the products are typically processed in gas, liquid, or powder form to facilitate flow of the material through the various steps of the production cycle. In addition, these products are usually mass-produced. Because of the ease of handling the product and the large volumes involved, a high level of automation has been accomplished in these industries.

The modern computer process control system generally includes the following: (1) measurement of important process variables such as temperature, flow rate, and pressure, (2) execution of some optimizing strategy, (3) actuation of such devices as valves, switches, and furnaces that enable the process to implement the optimal strategy, and (4) generation of reports to management indicating equipment status, production performance, and product quality. Today computer process control is applied to many industrial operations, two of which are described below.

The typical modern process plant is computer-controlled. In one petrochemical plant that produces more than 20 products, the facility is divided into three areas, each with several chemical-processing units. Each area has its own process-control computer to perform scanning, control, and alarm functions. The computers are connected to a central computer in a hierarchical configuration. The central computer calculates how to obtain maximum yield from each process and generates management reports on process performance.

Each process computer monitors up to 2,000 parameters that are required to control the process, such as temperature, flow rate, pressure, liquid level, and chemical concentration. These measurements are taken on a sampling basis; the time between samples varies between 2 and 120 seconds, depending on the relative need for the data. Each computer controls approximately 400 feedback control loops. Under normal operation, each control computer maintains operation of its process at or near optimum performance levels. If process parameters exceed the specified normal or safe ranges, the control computer actuates a signal light and alarm horn and prints a message indicating the nature of the problem for the technician. The central computer receives data from the process computers and performs calculations to optimize the performance of each chemical-processing unit. The results of these calculations are then passed to the individual process computers in the form of changes in the set points for the various control loops.

Substantial economic advantages are obtained from this type of computer control in the process industries. The computer hierarchy is capable of integrating all the data from the many individual control loops far better than

humans are able to do, thus permitting a higher level of performance. Advanced control algorithms can be applied by the computer to optimize the process. In addition, the computer is capable of sensing process conditions that indicate unsafe or abnormal operation much more quickly than humans can. All these improvements increase productivity, efficiency, and safety during process operation.

Like the chemical-processing industries, the basic metals industries (iron and steel, aluminum, etc.) have automated many of their processes by computer control. Like the chemical industries, the metals industries deal in large volumes of products, and so there is a substantial economic incentive to invest in automation. However, metals are typically produced in batches rather than continuously, and it is generally more difficult to handle metals in bulk form than chemicals that flow.

An example of computer process control in the metals industry is the rolling of hot metal ingots into final shapes such as coils and strips. This was first done in the steel industry, but similar processing is also accomplished with aluminum and other metals. In a modern steel plant, hot-rolling is performed under computer control. The rolling process involves the forming of a large, hot metal billet by passing it through a rolling mill consisting of one or more sets of large cylindrical rolls that squeeze the metal and reduce its cross section. Several passes are required to reduce the ingot gradually to the desired thickness. Sensors and automatic instruments measure the dimensions and temperature of the ingot after each pass through the rolls, and the control computer calculates and regulates the roll settings for the next pass.

In a large plant, several orders for rolled products with different specifications may be in the mill at any given time. Control programs have been developed to schedule the sequence and rate at which the hot metal ingots are fed through the rolling mills. The production control task of scheduling and keeping track of the different orders requires rapid, massive data gathering and analysis. In modern plants this task has been effectively integrated with the computer control of the rolling mill operations to achieve a highly automated production system.

Задание 2. Continue the sentences:

1. The term computer process control is generally associated with…
2. A high level of automation has been accomplished in these industries because of …
3. The computers are connected to a central computer …
4. If process parameters exceed the specified normal or safe ranges, the control computer ...
5. To optimize the performance of each chemical-processing unit the central computer …
6. The computer hierarchy is capable of …
7. To optimize the process …

8. The computer is capable of sensing …
9. All these improvements increase …
10. The basic metals industries (iron and steel, aluminum, etc.) have automated…
11. An example of computer process control in the metals industry …
12. The rolling process involves the forming of a large, hot metal billet by passing it…
13. Sensors and automatic instruments measure…

Задание 3. Read the text.

Flexible manufacturing systems

A flexible manufacturing system (FMS) is a form of flexible automation in which several machine tools are linked together by a material-handling system, and all aspects of the system are controlled by a central computer. An FMS is distinguished from an automated production line by its ability to process more than one product style simultaneously. At any moment, each machine in the system may be processing a different part type. An FMS can also cope with changes in product mix and production schedule as demand patterns for the different products made on the system change over time. New product styles can be introduced into production with an FMS, so long as they fall within the range of products that the system is designed to process. This kind of system is therefore ideal when demand for the products is low to medium and there are likely to be changes in demand.

The components of an FMS are (1) processing machines, which are usually CNC machine tools that perform machining operations, although other types of automated workstations such as inspection stations are also possible, (2) a material-handling system, such as a conveyor system, which is capable of delivering work parts to any machine in the FMS, and (3) a central computer system that is responsible for communicating NC part programs to each machine and for coordinating the activities of the machines and the material-handling system. In addition, a fourth component of an FMS is human labour. Although the flexible manufacturing system represents a high level of production automation, people are still needed to manage the system, load and unload parts, change tools, and maintain and repair the equipment.

Задание 4. Answer the following questions:

1. What is a flexible manufacturing system?
2. What is the difference of an FMS from an automated production line?
3. What kinds of products is an FMS ideal for?
4. What are the components of an FMS?
5. What are the processing machines?
6. What is a material-handling system capable of?
7. What is a central computer system responsible for?
8. What is a fourth component of an FMS?

9. Why are people still needed in FMS?

Раздел 5 Тема 5.2 Перспективы развития роботизированного производства

Задание 1. Study the text and get prepared to discuss the main items:
1. Why is the collaborative application of industrial robots evolving dramatically today?
2. What is the role of collaborative industrial robots?
3. How do advances in robotics technology allow us to use robots?
4. What functions do robots perform in different industries?
5. What is AL and its role in the future?
6. What are the opportunities of industrial robotics?

The Future of Industrial Robots and Applications

Today's robots are less about their mechanical structure. They are data collectors. Earlier generations of robots had to be separated into their own world, whereas today they can be integrated into the workforce.

In the past, robots were asked to do very specific tasks, usually in a fixed location. But today, the collaborative application of industrial robots is evolving dramatically, thanks to environmentally aware sensors that impact their form factor and functionality. Now, these collaborative industrial robots, or co-bots, work alongside factory operators, doing a fraction of all the stuff human workers do. The proliferation of sensors has made it possible for them to operate in an environment with people and record information about their environment. As a result, we can collect data on every step of the manufacturing process for full traceability and detailed data analysis to make better decisions for the future.

Advances in robotics technology also allow us to take robots from the factory floor and make them mobile and autonomous for brand new applications, such as in retail. Autonomous robots have taken grocery stores by storm in 2019, with Ahold Delhaize's introduction of Badger Technologies' robot, which is designed to improve store operations. Equipped with numerous sensors, navigation systems and cameras, the robot navigates store aisles alongside employees and customers to scan floors for hazardous conditions like spills. Concurrently, the robot keeps stock on missing, mispriced or misplaced inventory. But in the future, autonomous robots will work in all aspects of retail, from the warehouse to delivery.

In other industries, such as agriculture, robotic drones can examine a field to find deficiencies in crops. They can analyze the water and dryness levels while determining the ripeness of the goods. Mobile robots and drones monitor oil and gas pipelines and electric transmission systems performing regular inspection and looking for signs of maintenance needs, to efficiently dispatch maintenance teams.

At their core, robots still do the mundane, monotonous and time-consuming tasks employees don't enjoy while providing invaluable data to improve operations. Without sensors and other recent advancements, none of this would be possible. Artificial intelligence (AI), of course, is a key part of the conversation. AI will reshape the capabilities of robotic technology, but that's still at least a decade in the future. In the meantime, AI can help companies take a population of robots that do the same task and provide all the data to a centralized location, which in return can be used to make that whole network of robots smarter and more efficient.
In industrial robotics, success is about exponentials. It's riding exponential technology curves in related industries to robots in order to drive adoption. It's hard to drive technology innovation within an industry-but when you adopt technologies from "outside" industries, opportunities are limitless.

Задание 2. Прочитайте и переведите на русский язык текст “Why Robotic Automation is the Future in Manufacturing»

1.3 Учебные задания

6 семестр

Учебные задания выполняются в виде составления электронного письма по примеру:

Mrs Jane Tumin
HR Manager
Sommertim
7834 Irving Street
Denver, Colorado

Mrs Lean
9034 Cody Street
Denver, Colorado
USA, 90345

February 15, 2016

Dear Mrs Lean
With reference to our telephone conversation yesterday I am glad to tell you that we offer you the position of Senior Lawyer in our company. You will be provided with company car according to the corporate policy and full medical insurance. Your salary will be $100 000 per year according to your request. You may learn about job conditions in job offer attached to this letter.
With respect,

Jane Tumin,
HR Manager

2. Тестирование по лексике и грамматике

Тестирование проводится для определения степени усвоения материалов на практических занятиях, а также выполнения самостоятельной работы в рамках часов, отведенных на самостоятельную работу обучающихся, в СУО СибГИУ.

3 семестр

(Раздел 1 Тема 1.1, 1.2, 1.3)

1. My cousins are schoolchildren. …….study very well.
Ответ №1 he
Ответ №2 they
Ответ №3 your
Ответ №4 Her

2. Pass ……some bread, please.
Ответ №1 his
Ответ №2 me
Ответ №3 your
Ответ №4 Their

3. We are students of the Siberian State Industrial University. There are 25 students in ……group.
Ответ №1 they
Ответ №2 me
Ответ №3 us
Ответ №4 our

4. «Did you see our boss yesterday?» «No, I didn't. I haven't seen ……for ages».
Ответ №1 he
Ответ №2 she
Ответ №3 him
Ответ №4 his

5. My relatives have three children. ……children are wonderful!
Ответ №1 them
Ответ №2 they
Ответ №3 their
Ответ №4 he

6. I …..at the Art Gallery yesterday.
Ответ №1 is
Ответ №2 are
Ответ №3 was
Ответ №4 am

7. The students are writing a serious test now. Everybody …..very attentive.
Ответ №1 is
Ответ №2 are
Ответ №3 were
Ответ №4 am

8. They say that it……very cold next winter.
Ответ №1 was
Ответ №2 are
Ответ №3 will be
Ответ №4 is

9. ……you ready for the test now?
Ответ №1 are
Ответ №2 is
Ответ №3 were
Ответ №4 am

10. ……..the students…..at the laboratory tomorrow?
Ответ №1 was
Ответ №2 are
Ответ №3 will be
Ответ №4 is

11. Everybody ……the right to get higher education.
Ответ №1 have
Ответ №2 haves
Ответ №3 has
Ответ №4 will has

12. Who …..a pet at home?
Ответ №1 has
Ответ №2 have
Ответ №3 haves
Ответ №4 haven't

13. We cannot go there. We …… free time.
Ответ №1 do not have

Ответ №2 have not
Ответ №3 does not have
Ответ №4 haven't

14. She dreams that she…….a new house next year.
Ответ №1 had
Ответ №2 has
Ответ №3 will have
Ответ №4 haven't

15. ……..you…… any chance to get that job last year?
Ответ №1 will have
Ответ №2 Did have
Ответ №3 Do have
Ответ №4 Have not

16. Which is ….: the United States or Canada?
Ответ №1 large
Ответ №2 larger
Ответ №3 More larger
Ответ №4 More large

17. What is the name of the …. port in the USA?
Ответ №1 bigger
Ответ №2 biggest
Ответ №3 More big
Ответ №4 Mostbig

18. Moscow is the …. city in Russia.
Ответ №1 largest
Ответ №2 Most large
Ответ №3 More large
Ответ №4 Large

19. The London underground is the …. in the world.
Ответ №1 oldest
Ответ №2 older
Ответ №3 Most old
Ответ №4 Moreold

20. St Petersburg is one of the ….. cities in the world.
Ответ №1 beautiful
Ответ №2 most beautiful
Ответ №3 more beautiful
Ответ №4 beautifilest

4 семестр

(Раздел 1 Тема 1.4, 1.5)

A. ***Which verb forms are used in the following sentences?***

1. Several articles are being translated by the students of our group.
a) Presents Continuous Active
b) Past Continuous Passive
c) Presents Simple Passive
d) Presents Continuous Passive

2. The experiment was completed in our laboratory yesterday.
a) Past Continuous Passive
b) Past Simple Passive
c) Past Simple Active
d) Past Continuous Active

3. The industrial development of any country depends on its energy resource.
a) Past Simple Active
b) Presents Simple Active
c) Past Simple Passive
d) Presents Continuous Passive

4. His lectures are always attended by many students.
a) Presents Continuous Active
b) Past Continuous Passive
c) Presents Perfect Active
d) Presents Simple Passive

5. The secretary was typing the manager's report at 10 o'clock yesterday morning.
a) Past Simple Passive
b) Future Simple Passive
c) Past Continuous Active
d) Future Continuous Passive

B. Which is the best translation?

1. This plant was being built when we came here.
a) Завод был уже построен, когда мы приехали сюда.
b) Завод построили, после того как мы приехали сюда.
c) Когда мы сюда приехали, завод строился.
d) Мы приехали сюда на строительство завода.

2. Our geologists have discovered vast deposits of natural gas in the eastern areas.

a) Наши геологи открывали огромные месторождения природного газа в восточных регионах.

b) Наши геологи открыли огромные запасы природного газа в восточных регионах.

c) Наши геологи откроют огромные запасы природного газа в восточных регионах.

d) Наши геологи открывают огромные запасы природного газа в восточных регионах.

3. The new metallurgical plant will be equipped with up-to-date machinery.

a) Новый металлургический завод был оборудован современными станками.

b) Новый металлургический завод будет оборудован современными станками.

c) Новый металлургический завод оборудовали современными станками.

d) Новый металлургический завод оборудуют современными станками.

4. Our students have practical training at the mines.

a) Наши студенты проходят практику на шахтах.

b) Наши студенты проходили практику на шахтах.

c) Наши студенты прошли практику на шахтах.

d) Наши студенты пройдут практику на шахтах.

5. He has been offered a very interesting job institute.

a) Он предложил очень интересную работу в институте.

b) Он предлагал очень интересную работу в институте.

c) Ему предлагали очень интересную работу в институте.

d) Ему предложили очень интересную работу в институте.

C.Which verb form will you use to translate the following sentences?

1. В различных районах Москвы строятся новые линии метро.

a) have built

b) have been built

c) are being built

d) are building

2. Эксперимент был закончен к концу месяца.

a) had been completed

b) had completed

c) was completed
d) have been completed

3. Первая линия Московского метро вступила в строй в 1935 году.
a) has gone into operation
b) have gone into operation
c) had gone into operation
d) went into operation

4. Инженеры нашей фирмы разработали много новых приборов.
a) developed
b) have developed
c) has developed
d) were developed

5. Наши друзья вернутся из экспедиции на следующей неделе.
a) will be returned
b) are returned
c) is returning
d) will return

D. ***Which is the general question to following sentences?***

1. The sentences solve very important questions.
a) Does their scientists solve very important questions?
b) Their scientists very important questions solve?
c) Who did solve very important questions?
d) Do their scientists solve very important questions?

2. The engineer will test his automatic device in the laboratory.
a) Will test the engineer his automatic device in the laboratory?
b) Will do the engineer test his automatic device in the laboratory?
c) Will the engineer test his automatic device in the laboratory?
d) The engineer will test his automatic device in the laboratory?

3. The workers installed the X-rays unit at the plant.
a) Installed the workers the X-rays unit at the plant?
b) Do the workers installed the X-rays unit at the plant?
c) Did the workers install the X-rays unit at the plant?
d) Did the workers installed the X-rays unit at the plant?

4. Ferrous metals are widely used in all branches of machine-building industry.
a) Do ferrous metals are widely used in all branches of machine-building industry?

b) Are ferrous metals widely used in all branches of machine-building industry?

c) Are used ferrous metals widely in all branches of machine-building industry?

d) Are ferrous metals are widely used in all branches of machine-building industry?

5. Tomorrow they are flying to Moscow.

a) Are they flying to Moscow tomorrow?

b) Are tomorrow they flying to Moscow?

c) Are flying they to Moscow tomorrow?

d) Where are they flying?

5 семестр

(Раздел 2 Тема 2.1, Тема 2.2, Раздел 3 Тема 3.1)

A. ***Which is the general question to following sentences?***

1. English is the language of communication, business, science and culture.

A) English the language of communication, business, science and culture?

B) Is English the language of communication, business, science and culture?

C) Are English the language of communication, business, science and culture?

D) Does English the language of communication, business, science and culture?

2. Over 1 billion people learn English every year.

A) Learn over 1 billion people English every year?

B) Do over 1 billion people English every year?

C) Do over 1 billion people learn English every year?

D) Does over 1 billion people learn English every year?

3. A person can read original foreign newspapers and books.

A) Can a person read original foreign newspapers and books?

B) Does a person can read original foreign newspapers and books?

C) Can a person original foreign newspapers and books?

D) Do a person can read original foreign newspapers and books?

4. Many joint enterprises have appeared in Russian cities.
A) Are many joint enterprises appeared in Russian cities?
B) Do many joint enterprises have appeared in Russian cities?
C) Has many joint enterprises appeared in Russian cities?
D) Have many joint enterprises appeared in Russian cities?

5. Russian people travelled a lot.
A) Did Russian people travelled a lot?
B) Do Russian people travel a lot?
C) Did Russian people travel a lot?
D) Does Russian people travel a lot?

B. ***Which is the special question to the underlined words?***

6. There are four parts in the UK.
A) How many are there in the UK?
B) How many parts are there in the UK?
C) How many parts are in the UK?
D) How many are parts in the UK?

7. Northern Ireland is the smallest component of the UK.
A) Where is the smallest component of the UK?
B) Why is Northern Ireland the smallest component of the UK?
C) What part is the smallest component of the UK?
D) Which part is the smallest component of the UK?

8. Wales became a part of England in 1536.
A) When Wales became a part of England?
B) When did Wales became a part of England?
C) How did Wales become a part of England?
D) When did Wales become a part of England?

9. The wool industry is centered in Leeds and Bradford.
A) How is the wool industry centered?
B) Where is the wool industry centered?
C) When is the wool industry centered?
D) Why is the wool industry centered?

10. The Welsh are fond of folk music and poetry.
A) Who is fond of folk music and poetry?
B) Who are fond of folk music and poetry?
C) Who fond of folk music and poetry?
D) Who fonds of folk music and poetry?

C. ***Which verb forms are used in the following sentences?***

11. The library of Congress _____ in 1815.
A) were founded
B) is founded
C) will be founded
D) was founded

12. Several important government buildings _____ in Washington .
A) will be situated
B) is situated
C) were situated
D) are situated

13. The USA _____ of fifty states and the District of Columbia.
A) was made up
B) is made up
C) will be made up
D) are made up

14. The country _____ by native Americans.
A) wasn't settled and developed
B) weren't settled and developed
C) isn't settled and developed

D) aren’t settled and developed

15. The reconstruction of the National Gallery of Art _____ next year.
A) is finished
B) will be finished
C) was finished
D) were finished

D Which verb form will you use to translate the following sentences?

16. Вы не хотели бы выпить чашку кофе?
A) want
B) would like
C) will like
D) like

17. На какой рейс Вы хотели бы купить билет?
A) want
B) like
C) will like
D) would like

18. Вы любите гулять в парке?
A) like
B) want
C) would like
D) will like

19. Как бы Вы хотели оплатить счет за гостиницу – наличными или по карте?
A) like
B) will like
C) would like
D) want

20. Что Вы любите делать по вечерам?

A) would like
B) will like
C) want
D) like

6 семестр

(Раздел 3 Тема 3.2, 3.3)

I. Выберите форму глагола для перевода следующих предложений.
1. В Англии многие семьи живут в собственных домах.
a) lived
b) lives
c) live

2. Сотовый телефон будет играть главную роль в общении людей.
a) will play
b) played
c) is played

3. Жевательная резинка была изобретена в 1906 году.
a) invented
b) was invented
c) were invented

4. На первом курсе студенты изучают общеобразовательные предметы.
a) are studied
b) will study
c) study

5. Смотри! Самолёт летит!
a) is flying
b) flew
c) was flying

6. Закон всемирного тяготения объяснял движение планет.
a) was explained
b) is explained
c) explained

7. Многие проекты И.П. Кулибина не были реализованы.
a) do not realize
b) was not realized

c) were not realized

8. Текст уже перевели.
a) is already translated
b) has already been translated
c) was already translated

9. После окончания университета я буду работать по своей специальности на заводе или в исследовательском институте.
a) works
b) will work
c) will be worked

10. Сейчас эта проблема обсуждается во всех студенческих группах.
a) is discussing
b) is discussed
c) is being discussed

II. Выберите правильный перевод вопроса.
1. Кто изобрел телевизор?
a) Who did invent TV?
b) Who was invented TV?
c) Who invented TV?

2. Кого назначили директором?
a) Who was appointed a director?
b) Who has been appointed a director?
c) Who did a director appoint?

3. Ты хотел бы помочь ему?
a) Do you help him?
b) Will you help him?
c) Would you like to help him?

4. Какую программу пишет сейчас этот программист?
a) What program does this programmer write?
b) What program is this programmer writing now?
c) What program did this programmer write?

5. Ты любишь путешествовать?
a) You like travelling?
b) Are you like travelling?
c) Do you like travelling?

III. Выберите правильный вариант: a, b, or c.

1. He says ___ the weather is splendid.
   a) what b) that c) how
2. I know __ he is a good driver.
   a) since b) that c) which
3. I went to the shop ___ I wanted to buy some bread.
   a) that b) because c) if
4. I don't know __ he smokes.
   a) if b) who c) since
5. She left __ I came.
   a) before b) how c) who
6. I'll call you __ they come back.
   a) as soon as b) how c) which
7. He doesn't tell us __ they will come.
   a) who b) because c) when

7 семестр

(Раздел 4 Тема 4.1, 4.2)

Choose the best answer for each gap.

1. At first I didn't like my job, but _____ to enjoy it now.

A *I began* B *I'm beginning*

2. I don't understand this sentence. What _____ ?

A *does mean this word*	B *does this word mean*	C *means this word*

3. Jim is on holiday. He _____ to Italy.

A *is gone*	B *has gone*	C *has been*

4. Where's the book I gave you? What _____ with it?

A *have you done*	B *have you been doing*	C *are you doing*

5. _____ a lot of sweets when you were a child?

A *Have you eaten*	B *Had you eaten*	C *Did you eat*

6. Sam _____ in Scotland for ten years. Now he lives in London.

A *lived*	B *has lived*	C *has been living*

7. I’m tired. _____ to bed now. Good night.
A *I go* B *I’m going*

8. Don’t worry _____ late tonight.
A *if I’m* B *when I’ll be* C *if I’ll be*

9. What was the problem? Why _____ leave early?
A *had you to* B *did you have to* C *must you* D *you had to*

10. _____ a bit longer? but I really have to go now.
A *I’d stay* B *I’ll stay* C *I can stay*

11. We _____ by a loud noise during the night.
A *woke up* B *were waking up* C *were woken up*

12. A new supermarket is going to _____ next year.
A *building* B *be building* C *be built* D *build*

13. Paul left the room suddenly. He said he _____ to go.
A *had* B *has* C *have*

8 семестр

(Раздел 4 Тема 4.3, Тема 4.4, Раздел 5 Тема 5.1, Тема 5.2)

1. Hello, Mary. I didn’t expect to see you today. Peter said you _____ in hospital.
A *were* B *was* C *are*

2. “What time _____ ?” – “At 7.30.”
A *begins the film* B *does begin the film* C *does the film begin*

3. The police officer stopped us and asked where _____ .
A *we are going* B *are we going* C *we were going* D *were we going*

4. Do you want _____ with you or do you want to go alone?

A *me going* B *me to go* B *that I go*

5. I'm thinking _____ a house. Do you think it's a good idea?

A *to buy* B *of to buy* C *of buying*

6. _____ a hotel, we looked for somewhere to have dinner.

A *Finding* B *We found* C *After finding*

7. Sandra is _____ . She works in a large hospital.

A *nurse* B *a nurse* C *the nurse*

8. Helen works six days _____ week.

A *in* B *for* C *a* D*the*

9. Have you been to _____ .

A *Canada or US* B *the Canada or the US* C *Canada or the US* D *the Canada or US*

10. He's lazy. He never does _____ work.

A *some* B *no* C *any*

11. Good bye! I'll se you _____.

A *Friday morning* B *on Friday morning* C *in Friday morning*

12. When did they _____ the hotel?

A *arrive to* B *arrive at* C *arrive in*

13. Have you read anything _____ Ernest Hemingway?

A *of* B *from* C *by*

14. I'm not very good _____ repairing things.

A *at* B *for* C *in* D *about*

3. Диалог

(Подготовка диалога в рамках самостоятельной работы с последующим воспроизведением его на практическом занятии. Образцы диалогов представлены в методических указаниях к практическим занятиям и самостоятельной работе)

5 семестр

Раздел 2 Тема 2.1 Речевой этикет
Тема 2.2 Составление резюме

Диалог Телефонный разговор
Make up a dialogue using the following sentences.
Answering the phone (formal)
– Hello? Serena speaking. (caller unknown)
– John Sayles is speaking. Who's calling, please? (caller unknown)
– Doctor Martin's office. May I know who's calling, please? (caller unknown)
– Thank you for calling Jeans Plus. Jody speaking.
– Hello Maria. Nice to hear from you.
– Hello Dr Jones. How can I help you?
– City Library. Kim speaking. What can I do for you, Robert?
Introducing yourself
– Hey George. It's Lisa calling.
– Hello, this is Julie Madison calling.
Asking to speak with someone
– Can I talk to Josef? Tell him Marilyn's calling.
– May I speak to Mr. Green in the accounting department, please?
– Good morning. Is Dr Martin available, please?
Connecting someone
– Just a sec. I'll get him.
– Hang on a moment. I'll see if she's in.
– One moment please. I'll see if he's available.
– Hold the line please. I'll put you through in a moment.
– Please hold while I put you through to the manager's office.
– All of our staff are busy at this time. Please hold for the next available person.
Making a request
– Could you please repeat that?
– Would you mind spelling that for me?

– Could you speak up a little, please?
– Can you speak a little slower, please. My English isn't very good, I'm afraid.
– Could you let me know when she'll be in the office, please?
– Would you mind calling back in an hour? I'm in a meeting just now.
– Can you call again? I think we have a bad connection.
– Please hold for just a minute. I have another call.
– Please don't call this number again.

Taking a message

– Can I take a message?
– Would you like to leave a message?
– Sammy's not in. I can tell him you called if you like.
– No, that's okay. I'll call him later.

Job Interview

– Good morning, Miss Jones. So you applied for a job in our team. Am I right?
– Yes, I did. I sent my resume for a position of a restaurant manager.
– That`s good. I`d like to know a bit more about you. Probably you could tell us about your education first.
– Well, I left school at 17 and then for the next five years I studied at Kazan Federal University. I graduated the Department of economics with high honors and was qualified as a manager of enterprise. And after that I did a one-year computer course.
– Well. Your education sounds great, Miss Jones. And have you got any experience? Have you worked before?
– Certainly. First I worked as a manager at children’s clothes shop. I stayed there for four years and then I moved on to my present company. They offered me a job of a manager in a big cafe.
– That`s very interesting. Why aren’t you happy with your present job, Miss Jones? Why are you going to leave them?
– Well. The salary isn’t so bad, I must admit. But the work schedule isn’t convenient for me. And I often do a lot of overtime there. Besides you have an excellent reputation and I hope to have more opportunity and growth potential in your company.

– I see. Do you mind business trips? And are you fluent in Italian or German?
– Oh, foreign languages are my favorites. We did Italian and German at the University and I use them when I travel.
– Very good. Can you tell me about your good points then?
– Well… I start my work on time. I learn rather quickly. I am friendly and I am able to work under pressure in a busy company.
– OK. That's enough I think. Well, Miss Jones. Thank you very much. I am pleased to talk to you and we shall inform you about the result of our interview in a few days. Good-bye.

Раздел 3 Тема 3.1 Участие в переговорах в качестве специалиста

Диалог Организация и участие в переговорах, деловых встречах. Ведение переговоров.
Read and act the dialogue «Business negotiations».
– And now I'd like to discuss with you the year results of our new contract with the "TechArt Group".
– So the contract was signed 10 months ago and in the beginning the outcome was under a big question. We provided them with high quality raw materials for their production chain but one supply was with a big percentage of waste.
– So how did you solve the problem?
– We changed the delivery and suggested them a discount on the following dispatch. Now our total turnover is over 2 billion dollars. It is 5% higher than what we expected.
– That is a good outcome. Are they going to sign a contract for the next year deliveries?
– Yes, they certainly will. They are happy with our delivery terms and payments. And what is more, we are discussing their new project now.
– It is great. Keep working this way.

Диалог "At the bank"
Read and act the dialogue « At the bank».

– Good afternoon, madam.
– Good afternoon, sir. How can I help you?
– Yes. I'd like to withdraw $ 500.

– But you could have used our ATM machine for that purpose. It's very easy and fast.
– Well. I have just tried to access my account several times there. But I guess something is wrong with the machine.
– OK. Are you sure you entered the correct pin number?
– Absolutely. I've been your customer for about 10 years already and I've never been denied the access.
– OK, sir. Please, don't worry. Let's have a look at your account from my computer. Is it a saving or checking account?
– It's a checking account. Here is my ID, madam.
– Thank you, Mr. Barney. Can I have your account number, please?
– Sure. It's 4558 6742.
– OK. … Well. There is nothing wrong with your account, sir. So, what kind of transactions are you going to make now?
– I want to deposit this check and withdraw $ 500, please.
– OK. The money from your check should be in your account within 3 working days.
– Yes, I know.
– How would you like your cash?
– In 50's, please.
– Just a minute. Here is your cash, sir. Please, ensure that you've got the exact amount of money.
– Yes. Everything is right. And could I have my statement printed out, please?
– Certainly, sir. Here you are.
– Thank you for your help.
– Have a nice day!

Раздел 4 Тема 4.3 Участие в совещании, Тема 4.4 Участие в выставках в качестве специалиста, Раздел 5 Тема 5.1 Робототехника на производстве, Тема 5.2 Перспективы развития роботизированного производства

Диалог "Discussing budget planning"
Read and act the dialogue «Discussing budget planning».

– So we gathered here to discuss budget planning for the next year expenditures. What I want to underline is that basing on the latest research we are going to face some financial difficulties. So we need to prepare and cut the budget.

– First of all I would like to say that no redundancy will take place. We are staffed better than ever before. All our employees correspond to the required level and do their job well. Besides, we cannot cut down production financing. As even a small decrease in the quality of raw materials largely results in the goods quality.

– So what is going to be cut down is the marketing budget. I appreciate what marketing department does for the company. What is more, I realize that this is going to create huge difficulties for the marketers. But we all understand what will happen if we don’t do this way.

4. Оценивание обучающегося на зачете

Промежуточная аттестация производится на основе текущего контроля успеваемости при условии выполнения тестовых заданий в СУО СибГИУ в полном объеме и не менее 50% всех заданий в семестре, предусмотренных фондом оценочных средств по дисциплине.
